

# VEITO BLADE

Blade, bringing you warmth, inside or out, when and where you need it.

Made using the latest carbon fibre technology, Veito is modern, stylish and economical to run.

Veito Infrared Heaters have the perfect solution for your indoor and outdoor heating requirements.

The Veito Blade 2000 W is a sleek and beautifully designed, wall and ceiling mounted infrared heater. The modern slim line design does not occupy much needed space and quality construction will provide you with the heat you seek.

Easily installed the Blade can be mounted vertically, horizontally or suspended from a ceiling and fits in any space, inside or out.

Energy efficient and eco-friendly, 100% of the energy used by your Blade infrared heater is turned to heat. Installing the Veito Blade means you can heat zones and individuals instead of the entire space which helps you save money on your heating bill.

The Veito will start keeping you warm within seconds of being switched on. Automatic temperature control regulates power consumption based on your set temperature and eliminates hot and cold cycles.
