

# VEITO AERO 2500W

## An infrared heater that has functional longevity in any climate.

Like our Veito Blade, Aero is a stylish heater designed for use outdoors or indoors.

Producing instant and comfortable heat like the sun, the Aero warms you within seconds of being switched on.

Energy efficient and eco-friendly, 100% of the energy used by the Aero is turned to heat.

Made from highly recyclable materials like aluminium and glass. Every component of the Aero heater is optimised for performance, that includes the veito heating element producing mid-wave infrared heat.

Built using extruded aluminium designed to maximise thermal capacity and made of the latest carbon fibre technology, Aero gives you even heat distribution, not hot and cold spots. This technology produces 25% more heat than other infrared heaters.

The Veito Aero can be mounted on a wall or ceiling, and can be fixed vertically or horizontally.

Engineered as a robust outdoor-indoor heater for commercial and domestic use.

IP44 weatherproof design makes it ideal for places such as restaurants, bistros, cafes, offices, factories, patios, homes, conservatories, bathrooms and more...

### Specifications:

Model:	Aero
Dimensions (W x L x D)	700 x 55 x 208 (mm)
Maximum power (watts)	2500
Power Connection (amps)	10.9
Heat area - Outdoor	12 sq.m
Heat area - Indoor	25 sq.m
Heating Capacity	12,000 BTU's
Heating Element lifespan	10,000 h

### Features:

HIGH PERFORMANCE  
OUTDOOR-INDOOR HEATER  
IP 44 WEATHERPROOF CERTIFICATION

MAXIMUM POWER 2500 W  
EASY TO USE  
ALUMINIUM DESIGN

### Heat Area - Outdoor:

\* Heat areas are dependent on ambient temperature, wind and height placement of the heater.

Table layout is only indicative.

HO - AB2500  
Heat Area  
3m x 4m
